Apprenticeship 11/2009 – 12/2011

[CAIXA](#)

Brazil

- Gained comprehensive knowledge of banking operations during a two-year apprenticeship program
- Client account management and customer service

SUMMARY

Mobile & Web Developer with a foundation in Swift, SwiftUI, and JavaScript. Currently completing a RNCP Level 6 iOS Application Developer certification at Simplon, building on prior Full Stack training at Ironhack. Strong communication skills in English, French, and Portuguese. Actively building applications with attention to clean architecture and user centered design. Currently seeking an alternance opportunity to contribute to a project while completing my certification.

TRAINING / COURSES

Advanced Apple Foundation Program

RECENT PROJECTS

Aura — Mental Wellbeing iOS App

SwiftUI · MVVM · REST API · JWT · MySQL

- Built end-to-end: SwiftUI frontend with MVVM, generic async/await networking layer, JWT-authenticated REST API
- Implemented MVVM architecture with URLSession and Combine for reactive networking and clean separation of concerns
- Collaborated with 3 other developers across frontend and backend (Vapor)

My Secret Santa — Live on the App Store

Swift · SwiftUI · Vapor · MySQL

- Co-built during a 48h hackathon with the AAFP team. Won prize for most fun app
- MySQL schema design, Vapor/Fluent backend, App Store publication

ASL Project — visionOS Sign Language App

visionOS · ARKit · RealityKit · Swift Concurrency

- In this individual project I built a real-time American Sign Language recognition prototype for Apple Vision Pro using ARKit hand tracking and RealityKit 3D rendering
- Engineered a pose detection system that tracks all hand skeleton joints per frame, calculates finger extension via joint distances, and applies temporal filtering to confirm letter recognition
